Subject: Leed Specifications

To Whom It May Concern:

Plastic Trends manufactures three primary product groups of PVC fittings. PVC Solvent Weld DWV Fittings per ASTM D2655 and CSA B181.2, these fittings are third party certified by NSF, UPC and CSA. PVC SDR 35/SDR 26 Gasketed Sewer Fittings per ASTM D3034 and CSA B182.2, these fittings are third party certified by NSF, UPC and CSA. PVC SDR 35 Solvent Weld Sewer Fittings per ASTM D3034 and CSA B181.2, these fittings are third party certified by NSF, UPC and CSA.

ASTM, CSA and NSF require DWV Fittings, Gasketed Sewer Fittings and Solvent Weld Sewer Fittings to be manufactured from virgin PVC resin and Plastic Trends complies with this requirement. However, the standards permit the reuse of fitting compounds in the manufacture of new product, as long as the material is internally generated. This reuse of material meets the criteria of Recovered Material as defined by ISO standards and the Recycled Material criteria of ISO and the U.S. Environmental Protection Agency. As a result, the manufacturing process of the three primary product lines is waste free of solids.

Sincerely,

Jay Eversoll
Vice President Sales & Marketing
