Quality Fittings By Design

## Fabricated Sewer Fittings Standards Compliance

Plastic Trends fabricated sewer fittings up to 15" diameter are manufactured in compliance with ASTM D3034 and ASTM F1334. They are tested and certified by NSF to ASTM D3034 and ASTM F1334.

Plastic Trends fabricated sewer fittings 18" diameter and larger are manufactured in compliance with ASTM D679 and ASTM F1334. They are tested and certified by NSF to ASTM D679 and ASTM F1334.

Gasketed sewer fittings are tested for joint tightness according to ASTM D3212 to ensure adequate sealing properties under pressure and vacuum conditions for angular deflections, top load deflection and straight alignment.

All Plastic Trends fabricated gasketed sewer fittings use the Rieber gasket system, ensuring a tight and reliable seal.

Third party test reports of Royal fabricated sewer fittings are available upon request.
